MUSIC 11 EARS

Number Talk:

75 x 3

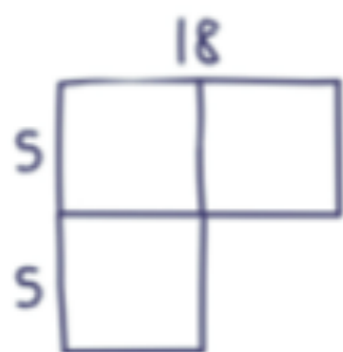

18 x 5

Neil

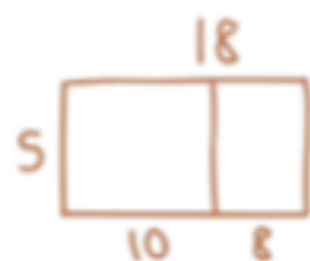

$$45 + 45 = 90$$

Ricardo

$$18 \times 5 = 9 \times 10$$

Sammi

$$(10 \times 5) + (8 \times 5) \\ 50 + 40 = 90$$

Jaime

$$20 \times 5 = 100 \\ 2 \times 5 = 10 \\ 100 - 10 = 90$$

Ariane

$$15 \times 5 = 75 \\ 3 \times 5 = 15 \\ 75 + 15 = 90$$

Bryan

$$(18 \times 2) + (18 \times 2) + 18 \\ 36 + 36 + 18 = 90$$

Number Talks

$$125 \times 4$$

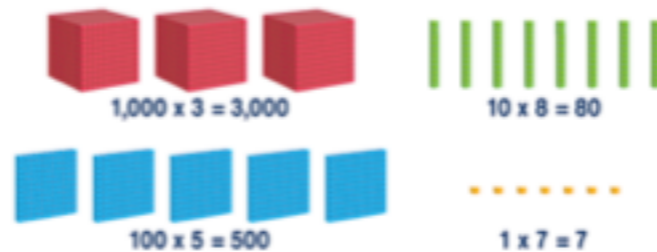

$$25 \times 14$$

Place Value

Billions	Hundred Millions	Ten Millions	Millions	Hundred Thousands	Ten Thousands	Thousands	Hundreds	Tens	Ones	Tenths	Hundredths	Thousandths
						3, 5	8	7				
Three thousand, five hundred eighty-seven												
				2	9	4, 7	1	0	.	6	2	5
Two hundred ninety-four thousand, seven hundred ten and six hundred twenty-five thousandths												
	7	1	8,	0	6	0,	4	9	5	.	3	
Seven hundred eighteen million, sixty thousand, four hundred ninety-five, and three tenths												

Model Form

The model form is a visual representation of a number using groups of blocks for each place value. Each block represents a different value depending on the number of cubes it has.

Expanded Form

The expanded form of this number can be written in two ways. Sample 1 is more commonly used, but both are correct.

Sample 1:
 $3,000 + 500 + 80 + 7$

Sample 2:
 $3,587 = (3 \times 1,000) + (5 \times 100) + (8 \times 10) + 7$

The place value is the value of a digit based on its position in a number.

Zero acts as a placeholder when there is no value in a column.

Numbers on the right of the decimal point represent a fraction of a whole number.

Post Card Story

Postcard Fiction

Humpty sat, quietly watching the soldiers below, when the first shot rang out. The bullet nicked the top of the wall, just inches from where he was sitting. As he scrambled to get away, a second bullet caught him between the eyes. He was dead before he hit the ground.

Postcard Fiction

They tell us to ignore the noise. Just the house creaking with old age, they say. The trouble with parents is, they don't see things. Not like we do. We've seen the creatures that make that noise and, trust us, they are not happy.

The Racist Raisin

My gran was making currant buns. The flour and egg and all that stuff was mixed in the bowl and she tipped in the currants. As they fell into the mix a huge currant jumped up and shouted, "This is unfair, I'm a raisin, not a currant, I don't deserve to be treated like this."

"How should you be treated?" My gran asked.

"I'm a fat and juicy, all golden in colour. Look at these currants, all dried and dark and shrivelled."

"What's wrong with being dark and shrivelled?" Said my gran, whose skin looked like mahogany leather.

The raisin was abashed.

"There's nothing wrong with it," it said, shamefaced, "but it's not the way I'm supposed to be. If I was a currant I'd accept the way I was but I ain't no currant, I'm a raisin, and I'm proud of it."

"You're a racist," said my gran, "thinking you're better than anyone else."

"No I ain't," shouted the raisin, but his voice was filled with cake mix as my gran stirred him in with all the other ingredients.

When they were cooked I carefully broke my current bun into tiny bite sized pieces to check for a raisin 'cos I didn't want to eat something that might cause trouble inside me. I'd seen a race riots on TV. I didn't want one in my tummy.

Captain's Blog

Felines are difficult to keep in space.

Their territorial nature makes communal living a nightmare, and it's not like they can just slip outside if things are too cramped.

Litter trays are a serious biohazard; we've had to weight them down to stop them floating around like extremely unhygienic feathers

Their food reliably tastes better than the dreck we humans are given, so I have to stop the crew from pinching it. It even comes in vacuum-sealed pouches.

Plus they have a nasty habit of clawing apart oxygen pipes, looking for mice.

(The cats, I mean, not the crew.)

Needless to say, we can't let them anywhere near the lab rats.

I've been asked why I keep them on board at all.

Four words:

Zero Gravity Cat Pics.

FIXED

GROWTH

Fixed Mind-set
Intelligence is static

Growth Mind-set
Intelligence can be developed

CHALLENGES

...avoid challenges

...embrace challenges

OBSTACLES

...give up easily

...persist in the face of setbacks

EFFORT

...see effort as fruitless or worse

...see effort as the path to mastery

CRITICISM

...ignore useful negative feedback

...learn from criticism
